

STARTER KIT SK25

STATIC CUTTER FOR
CUTTING-HEIGHT UP TO 25 MM

KURIS

Starter Kit SK25

TECHNICAL DATA SHEET:

Cutting Table:	Static
Max. Cutting height:	25 mm
Working width (Y):	1,60 m / 2,00 m
Total width (incl. bridge):	2,50 m
Working length (X):	3,40 m + 2,40 m modules
Total length:	4,75 m

Max. Cutting Speed:	40 m/min
Max. Positioning Speed:	70 m/min
Max. Acceleration:	4 m/s ²

Cutting head

Knife size:	2 x 6 mm
Tools:	Drilling device Drawing device

Power requirements

Operating voltage:	400 V, 50/60 Hz
Controls / Drive:	2,5 kW
Vacuum Unit:	7,5 kW / 11 kW
Total main power:	10 kW
Fuse:	25 A
Protection class:	Class 1
Compressed air (5-6 bar):	10 l/min 180 l/min (for drilling device)

Weight:	ca. 1.500 kg
Working height:	0,85 m

Acoustic level:	57 - 74 dB(A)
Mark of conformity:	CE

The SK25 from Kuris Spezialmaschinen offers all advantages of a fully automatic CNC Cutter with a very attractive value for money. Due to the small dimensions of the cutter, the Starter Kit is ideal for small spaces. Sample cuts, small or medium sized series - the Starter Kit from Kuris is the perfect solution, if flexibility, efficiency and accuracy is required for a very convenient price. Based on the established Kuris Technology, this system offers all features, that can also be found at large cutting systems. The cutting height of the Starter Kit with up to 25 mm provides a wide field of applications. The cutting window with the dimensions 1,60 m x 3,40 m offers enough space for most cutting orders while the table dimensions are still very compact. It can be extended with modules of 2,40 m. The Starter Kit is the perfect system, if easy, fast and economic solutions are required.

PRODUCT RANGE:

Fully automatic cutting technology | CAD-Software Solutions | Round knife machines | Straight knife machines | Servo-Cutter | Band knife machines | Spreading machines | Cutting and spreading tables | Conveyor tables | Custom machines

Kuris, the specialist in innovative spreading and cutting technology. Our product range offers solutions for various individual requirements. Our showroom offers the possibility for demonstrations and cutting tests with your individual materials. For further information about our products, please send us your enquiry.

We would be pleased to give you an individual consultation.

Technical changes maybe possible.
